Own Assets

With a volume of EUR 5.3 billion, IKB AG has outplaced a significant portion of credit risks of its loan portfolio. The bulk of these synthetically executed securitisations were performed using the KfW PROMISE platform and contain replenishment clauses, meaning that payments that become due can, in accordance with predetermined parameters, be replenished either in whole or in part. By means of these replenishments IKB re-securitised a loan volume of EUR 1.3 billion during the financial year 2002/2003.

Investments in international loan portfolios

In part, IKB AG uses the freedom for manoeuvre resulting from these outplacements as a means of expanding its domestic loan operations; on the other hand, IKB AG invests in international loan portfolios in order further to improve the diversification of its loan assets as well as its earning structure.

At March 31, 2003, IKB AG's portfolio of balance sheet-relevant investments in international loan portfolios came to EUR 1.9 billion. These investments are made in diversified portfolios in a range of asset classes. IKB AG invested especially in asset-backed-securities issues and in securitised corporate portfolios in the United States and Western Europe. With respect to regions two-thirds of our investments accounted for Northern America and one-third for Western Europe. Fixed Income

Fixed income management focuses on the stabilisation of interest surplus emanating from the position of the liquidity book as well as the long-term creation of evaluation reserves.

Generally IKB AG invests in top rated bonds, especially in floating rate notes, which with the use of swaps are being transformed into fixed interest rates. In addition, various optional elements are embedded for further improvement of interest rate cash flows.

Proprietary Trading

IKB AG is active in interest rate and stock market trading. Although proprietary trading is not of strategic relevance to IKB AG's earnings, it is run as a profit centre and has produced stable profits over the years.

Risk is monitored online on a mark to market basis. A value-at-risk approach is also applied.
