Figure 1. A schematic diagram of the experimental setup. The laser beam (red arrow) is focused onto the sample surface (black arrow) through a lens system (lens 1, lens 2). The sample is held in a vacuum chamber (grey box) and is illuminated by a white light source (blue arrow). The scattered light is collected by a lens system (lens 3, lens 4) and directed to a spectrometer (green box). The spectrometer is connected to a computer (yellow box) for data analysis.

Figure 1. A schematic diagram of the experimental setup. The laser beam (red arrow) is focused onto the sample surface (green arrow). The scattered light (blue arrow) is collected by a lens and detected by a photomultiplier tube (PMT).

Figure 1. A schematic diagram of the experimental setup. The light source (laser) emits a beam that passes through a lens and a polarizer. The beam is focused onto a sample stage, which holds a sample and a reference mirror. The reflected light from the sample and the reference mirror is collected by a lens and focused onto a photodetector. The photodetector is connected to a lock-in amplifier, which is connected to a computer.

Figure 1. A schematic diagram of the experimental setup. The light source (laser) emits a beam that passes through a lens and a polarizer. The beam is then directed onto a beam splitter, which splits the beam into two paths. One path is reflected by a mirror and passes through a lens and a polarizer. The other path is reflected by a mirror and passes through a lens and a polarizer. The two paths converge at a camera.

The figure shows a spectrogram of a complex audio signal. The x-axis represents frequency from 0 to 1000 Hz, and the y-axis represents time from 0 to 10 seconds. The spectrogram displays several distinct horizontal bands of energy, with colors ranging from dark blue to bright yellow. A prominent yellow band is visible around 500-600 Hz, while other bands are more scattered across the frequency range. The overall pattern suggests a complex audio signal, likely a recording of a bird or insect call.

The treemap visualization illustrates the breakdown of costs. The largest category is Tilgungs- und Gesamtkosten (Tilgungskosten), which is further divided into Zinsen, Mietkosten, and Betriebskosten. Other significant categories include Baukosten (Construction Costs) and Lohn- und Gehaltskosten (Wages and Salaries). The smallest visible segments are Verwaltungskosten (Administrative Costs) and Sonstige Kosten (Other Costs).

This image shows a single page of a document that has been extensively redacted. The page is filled with large, solid black rectangular boxes that completely obscure the original text. There are several such boxes of varying sizes scattered across the page, covering most of the content. A few small, unredacted snippets of text are visible, such as "AMERICAN" at the top center and some names like "John Doe" and "Jane Smith" in the middle section. The overall appearance is that of a classified or confidential document that has been protected from disclosure.
